

The Solution

Protection that works hard and stays out of sight. Instead of reacting to damage, refurbish with intent.

Acculine offers a smarter, more practical alternative to full renovation by protecting the surfaces that experience the most impact before damage becomes visible.

Our wall and door protection systems are designed to integrate seamlessly into existing interiors, restoring visual consistency while significantly improving durability.

Acculine helps hotels extend the life of what's already there.

A Solutions Partner, Not Just a Supplier

Acculine works closely with architects, designers, builders and operators to ensure protection is integrated early, not retrofitted later.

- **Australian-owned with local manufacturing capability**
- **One of the widest colour and finish ranges available**
- **Quick turnaround and strong local inventory**
- **Products designed specifically for hospitality use**
- **Proven performance in hotels and accommodation nationwide**

Our mission is simple: keep your hotel looking new for longer.

ACCULINE

Quietly elevating the guest experience

Keep your spaces looking new, without looking protected

Protection that preserves the experience

The Challenge

In an environment where perception is everything, visible wear quietly erodes the guest experience.

In hotels and accommodation, guest experience is shaped by what they don't notice.

- Luggage wheels scrape walls.
- Housekeeping carts strike corners.
- Doors and frames absorb thousands of impacts every year.

Scuffed walls and chipped corners
Spaces begin to look and feel tired long before their time.

The challenge isn't just restoring and repairing visual appearance - its keeping spaces looking new for the long-term.

Protect now. Renovate less.

By addressing the cause of wear and damage, not just the symptoms, Acculine supports hotels and accommodation operators reduce renovation and refurbishment cycles, control long-term costs, and maintain their property with confidence.

That's protection as a strategic decision, not just a product.

Door & Door Frame Protection

Prevent damage at the most vulnerable points.

- Full and half-height door protection
- Custom one-piece door frame protection
- Rigid vinyl and stainless-steel options

Ideal for:

Absorbing impact from luggage, carts and service equipment without altering door appearance.

Palladium® 3D Trim

Architectural detail with integrated protection.

- Durable timber-look, metallic and natural stone profile options
- Decorative and protective in one system without full renovations
- Introduce warmth and texture without compromising durability

Ideal for:

Feature walls in guest rooms, corridors and shared communal spaces needing an uplift.

Corner Guards

Maintain the integrity and strength of corners in high-traffic areas.

- Built-in resilience where impact is unavoidable.
- Tape-on, flush-mount and high-impact corner guard solutions
- More than 80 Dulux and colour-matched finishes

Ideal for:

Front-of-house and back-of-house entrances, elevator, carpark and lobby thoroughfares.
