

# *Steri-Core*™ by ACCULINE

## The world's first antimicrobial 'to the core' door handles

Steri-Core's unique material and products can help prevent the spread of healthcare associated infections, by providing clinically proven antimicrobial protection at the point of contact.

**Kills novovirus, MRSA, eColi. and is anti-fungal**

## Ideal for many applications:

- Hospitals
- Aged Care facilities
- Medical Centres
- Mental health facilities
- Schools
- Universities
- Offices; and
- anywhere you wish to reduce infection and illness

**Possibly the most important purchase you will ever make for your business.**

This is the most dangerous item  
in your school or workplace...

The toilet  
door  
handle!

Norovirus

Salmonella

Legionella

E-Coli

MRSA

Door handles, particularly those on toilet doors, are one of the fastest ways for infections and viruses to spread. This is no surprise given that some door handles are touched hundreds, or even thousands of times per day.

Handles in a school or university toilet can be home to up to 40,000 harmful germs per square inch.

**One in five people have admitted they don't always wash their hands after going to the toilet.**

**And almost two in five don't always wash their hands before touching food.\***

## Our Amazing Achievement

At Stericore we are proud to have invented the 'World's First' Antibacterial 'To The Core' range of handles. Our products have been independently UK tested and are clinically proven to kill 99.9% of all known harmful bacteria creating a unique sterile surface that germs can not live on. All test reports available on request.

Invention - innovation through science

# Could your staff or business be at risk?

Door handles are one of the largest touch points in any business. Traditional stainless steel or painted handles increase the spread of infections by providing an area for transmission to occur, creating more carriers.

You can now protect your staff, visitors and even your family from harmful bacteria.

Clinically proven to kill 99.9% of all known harmful human bacteria including:

- **Norovirus**
- **E.Coli**
- **MRSA**
- **D.Difficile**
- **Salmonella**
- **Fungal**
- **Legionella**

Steri-Core's handles are manufactured from a one-piece, unique, non-porous, ultra-strong durable nylon. Antimicrobial silver additive runs through the handles to their core. This is clinically certified to kill 99.9% of all known human bacteria and prevent any bacteria from growing on their surface. **Even if the product becomes scratched or damaged in any way, it still retains its antimicrobial properties** – guaranteeing a safe environment for you and your staff.
