

The Revolutionary Healthcare Curtain Tracking System

The Problem

Suspended Curtain Tracking

Eyesore

Stands out...in a bad way

Flimsy

Suspended, with very few connection points

Difficult

Complex and unsafe to change

Australia has been saturated with suspended cubicle tracking systems for healthcare for decades.

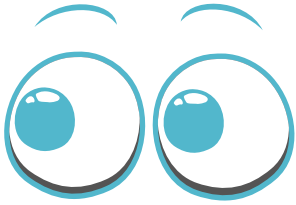

Although over the years some systems have got more slimline, spanned greater lengths and developed innovative ways to change curtains safely, these fundamental issues never entirely went away, they only reduced.

At Acculine, we challenged the status quo and said, what if cubicle tracking could be Attractive, Durable and Easy to change?

The Solution

Ceiling Mounted EZE-Swap Curtain Tracking

Attractive

Durable

Easy to change

Acculine's EZE-Swap Continuous mount curtain tracking, results in a system that is attractive, durable and easy to change

No visual interference with ceiling mounted design, compared to traditional suspended design

- EZE-Swap curtain system has a mesh top enable smoke sensor operation
- EZE-Swap curtain system has a press stud design to enable easy and safe changing of curtains, without a ladder

The continuous mount system ensure the system is supported at every point, rather than the flimsy nature of a suspended design

Ceiling Mounted Curtain Tracking
