Learn

Schools, Childcare + Universities

Learning is a lifelong journey. Childcares, schools and universities today are training tomorrow's leaders and brimming with potential. Together students play. Together they collaborate. Together they learn. Your learning space should make students feel comfortable and provide an undistracting and fun environment that promotes learning. Our future leaders shouldn't have to be distracted by scuffs on walls and dented doors. They don't want their learning journey to be defined by tired and worn buildings. Make their memories bright and pleasant by protecting your interiors to keep them looking new for longer.

Travel

Airports

People love to travel. Airport terminals and stations connect us physically to the world we live in. They connect friends and families from across the globe. Airports are our visitors first impression of our country. Let that first impression be a good one, a clean one. Not one scarred by dirty bathrooms and tired interiors. Use it as an opportunity to promote the great country in which we live - not detract.

Eat

Restaurants + Cafes

We dine to celebrate. We dine to connect with each other. We dine to avoid cooking. Whatever the reason, dining brings people together. Your dining space should not only create an ambience, but also make people feel comfortable about the food that they will enjoy. People don't want to gather in spaces that look worn with the bruises of trays and chairs. They don't want to eat in facilities that look dirty and uninviting. Keep dining areas just as fresh and delightful as the salad course with products that preserve the flavour of your space.

Shop

Retail

Groceries, clothes, gifts, gadgets, books - good thing shopping carts and shopping baskets were invented. Or is it? While carts are great for business, they're not so great for the walls and fixtures of your retail space. Even if there aren't carts roaming the aisles, purses, bags, strollers and racks can all take their toll. Keeping retail areas clean and protected from damage while making them inviting are the keys to a successful business.

Workout

Gyms

A gym is a place where we workout. They are tough and rugged places characterised by sweat and exertion. Motivation can be difficult. Make it a place that people enjoy coming, to unwind, socialise and recharge. Make it an inspiring and energizing place to visit, with Aspex backprinted clear wall protection and NuTree Diamond Plate wall protection.

Work

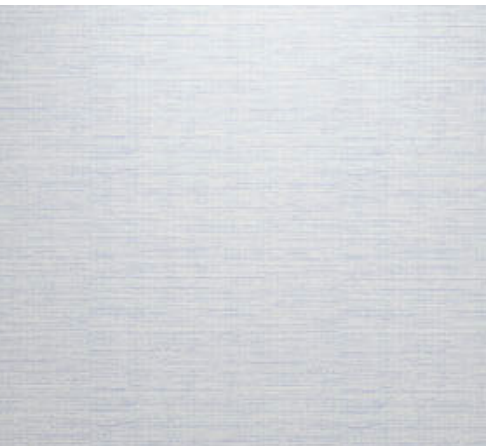

Offices + Conference Rooms

A work space should help people be as efficient and energised as possible. Preventing unsightly damage from desk chairs can ensure even the most basic areas are taken care of so workers aren't distracted. Make sure your work spaces are protected and comfortable so your building and employees are positioned for maximum performance

Rest

Hotel + Aged Care

A guest room can make or break a person's experience, not only with your property, but with your brand. Damage from luggage, cleaning carts and every day wear and tear can make rooms look run down. Protect your rooms and add the warmth of home so people always feel safe and welcome.
