

# 502 Series

A01 - Floor to Floor  
A02 - Floor to Wall

**Movement Rating ± 50%**

## Product Guide

- ▶ 1 5/8" (40mm) Deep pan ideal for floor finishes with increased depths such as marble, granite, limestone and paver systems
- ▶ Hinged pan rides up the canted frame under seismic movement then returns to position to maintain egress routes
- ▶ System provides for unlimited lateral movement.
- ▶ Pan profile provides a vertical surface to abut tile against, eliminating the need to bevel flooring edges for flooring up to 3/8" [10mm].
- ▶ Symmetrical reveals align for Floor-to-Floor and Floor-to-Wall applications
- ▶ System is capable of reducing joint widths up to 8" (203mm) down to two 1" (27mm) sightline reveals.
- ▶ Narrow visual sightlines minimize aesthetic disruption to your space.
- ▶ Use sealant that matches the adjacent floor finish to further conceal the sightline reveals.
